

Hand chain hoist

Product code: KII_XXX | **Category:** Hoist, winch and ratchet

Short description

Our hand chain hoist is an accessory that is very useful for handling very heavy loads.
 Lifting height: 3 metres.
 Available in various models:

- Load capacity: 1 ton
- Load capacity: 1,5 ton
- Load capacity: 2 tonnes
- Load capacity: 3 tonnes
- Load capacity: 5 ton
- Load capacity: 10 ton
- Load capacity: 20 ton

We deliver all over Europe!
 For further information please call: +39 0735 702346

Technical specifications

Weight	11 kg
Portata	1 ton, 1,5 ton, 2 ton, 3 ton, 5 ton, 10 ton, 20 ton

Product variations

Variation name	Variation values	Variation SKU
Hand chain hoist - 1 ton	Load capacity: 1 ton	0000000380
Hand chain hoist - 1,5 ton	Load capacity: 1,5 ton	0000000442
Hand chain hoist - 2 ton	Load capacity: 2 ton	0000000443
Hand chain hoist - 3 ton	Load capacity: 3 ton	0000000444
Hand chain hoist - 5 ton	Load capacity: 5 ton	0000000445

Product description

Hand chain hoist

Our hand chain hoist is a tool used for lifting very heavy loads. It is made of steel so that it is very strong and therefore not subject to obsolescence. It can be employed in various work contexts such as construction sites, workshops or warehouses. Thanks to this device, a lot of effort is saved, goods are moved faster and the production process is streamlined. With no need for additional power sources, you can gain maximum flexibility and handling.

This hand chain hoist is equipped with a traction device attached with a hook placed on a ceiling or a scaffold. It also has a second hook attached to the chain. This hook has a locking system that makes the load stable and prevents it from falling to the ground. By first pulling up the chain, the operator sets in motion a mechanical gear that will multiply the force exerted by himself. The device reaches a lifting height of 3 metres.

Although it is built as carefully as possible, it is very advisable to adopt a procedure to prevent injury. It is also wise to ensure that the hook is securely fixed to the ceiling or the scaffolding and not to take it for granted that the chain has no defects or some links are damaged. Furthermore, the operator must, of course, check that the weight of the loaded goods is within the permitted load capacity of the hoist being used.

This accessory fulfils the requirements for CE certification, an essential document which guarantees quality and safety.

We offer several models, differing in capacity, weight and size:

- Load capacity: 1 ton
- Load capacity: 1,5 ton
- Load capacity: 2 tonnes
- Load capacity: 3 tonnes
- Load capacity: 5 ton
- Load capacity: 10 ton
- Load capacity: 20 ton
