Product description

Professional Electric Hoist 220-240V for Lifting from 160 to 500 kg

The professional 220–240V electric hoist is the ideal solution for fast and safe lifting of materials in workshops, warehouses, construction sites, agricultural businesses, and industrial environments. Thanks to its compact structure and high-performance motor, this compact electric hoist guarantees reliability, practicality, and ease of use even in limited spaces.

Available in various lifting capacities from 160 kg up to 500 kg, it is designed for professional applications requiring a compact yet powerful lifting system. Its robust construction and high-quality components ensure safe operation during handling, maintenance, and installation activities.

Main Features

- Single-phase 220–240V power supply
- Available capacities from 160 kg to 500 kg
- Compact and space-saving design
- High-efficiency industrial brushless motor

- Automatic braking system for enhanced safety
- High-strength steel cable
- Quick and easy installation
- Ideal for professional and industrial use
- User-friendly pendant control
- Components designed for intensive applications

Compact and Professional Electric Hoist

This professional electric winch is designed for users who need a reliable, compact, and easy-to-install lifting system. Its compact dimensions make it suitable for mobile workshops, confined work areas, warehouses, industrial facilities, and technical workstations.

The high-performance motor ensures smooth and consistent operation, while the automatic braking system helps keep the load secure during lifting operations.

Ideal for Multiple Applications

The professional 220V electric hoist is suitable for:

- Material lifting in workshops
- Warehouse goods handling
- Technical installations
- Industrial maintenance
- Agricultural sector
- Construction sites
- Industrial vehicles
- Special vehicle equipment setups

Thanks to its compact structure and ease of use, it represents a practical and versatile solution for many professional lifting needs.

Safety and Long-Term Reliability

The hoist is equipped with systems designed to improve safety during lifting operations. The high-strength steel cable and automatic braking system help ensure stability, load control, and reliability even during frequent use.

Its solid construction quality and professional-grade components make this compact electric hoist an ideal solution for operators seeking high performance and long service life.

Available Capacities

Different models are available to suit various operational needs:

- 160 kg
- 180 kg
- 230 kg
- 250 kg
- 280 kg
- 300 kg
- 360 kg
- 500 kg

To choose the most suitable model for your needs, our technical team is available to help you select the best professional electric hoist for your application.
