Short description

Small crane manual 50 explosion-proof capacity 200 kg
 The new lifting solution: simple, effective and safe!
 This is the manually operated mini crane.
 DIY installation on light vehicles.

Technical specifications

Weight	60 kg
Dimensions	Length: 67 cm Width: 32 cm Height: 122 cm

Product description

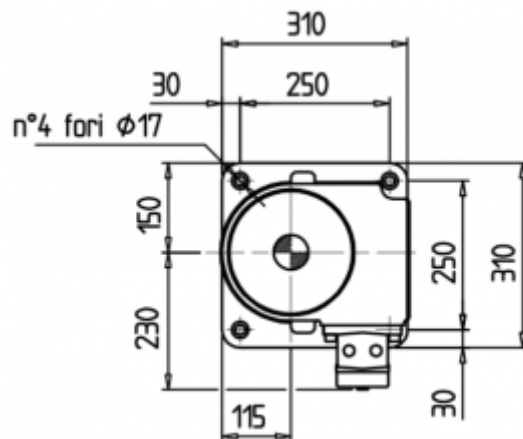

Small crane manual 50 explosion-proof capacity 200 kg
 Soltecshop.com offers among the lifting solutions the mini manual crane 50 with a capacity of 200 kg at the peak. The **manual** mini crane has a fully manual drive without battery, is light in weight and versatile.
 To carry out the three maneuvers (extension, rotation and lifting) the help of the operator is essential. The 360° rotation is carried out by means of a crank, the lifting thanks to a hand pump and the extension through a pin which will be inserted in the hole present on the extension.
 Easy to install on light vehicles such as pick-ups, vans and trucks.
 The crane is delivered with CE certificate and instruction manual.
 This min crane is *Explosion proof* in accordance with *ATEX Directives*. A key aspect of our manual mini crane, in fact, is its compliance with the ATEX regulation, which allows our crane to be in force for explosion protection for safe use in potentially hazardous environments, such as the chemical and petrochemical industries, oil and gas installations, mining, and companies involved in tunnel construction and maintenance. In short, ATEX explosion-proof cranes play a crucial role in sensitive industrial environments, helping to protect the safety of operators and the integrity of structures in the presence of potential hazards.
 Below you find the mini crane 50 capacity diagram:

MINI GRU 50 Soltecshop.com
